2020 EDITION

# OUR STORY

Heart and passion in everything is how our story began. Our family started serving Philippine market for more than three decades as JNRM Corporation. JNRM's heart and passion go beyond the company as its products also benefit the livelihood of various local communities. As time goes by, we decided to segregate new products as other leg company to focus better on establishing sales and development. With this, we created seven new corporate companies namely **Wellness Naturale, NewYou Marketing, Appetissant Group, Don Nick's Group, Medicure Group, Primefoods Group, and Clouded.**

Driven by our dreams and vision, we mastered our specialty for several years of experience in the field of manufacturing. We have chosen to explore and penetrate new markets to boost our business. Our group of companies' expansion is a proof of the company's success and innovation which brings out life's simple, sweet pleasures in many ways.

We believe that our products have a great advantage in the global market for we continue to upgrade our products and services to meet the needs of our customers.

SERVING MORE THAN 40 YEARS

# JNRM GROUP

## **MISSION**

To create and promote food products of highest quality and compete global standards.

## **VISION**

To inspire and be a renowned food company that supply export quality products.

## **VALUES**

Committed to excellence, continuous innovation, teamwork, customer satisfaction and community development.

# WHAT WE DO?

*We grind so others can thrive.*

At JNRM Group, we do everything with a heart, helping local farmers, building communities, teaching entrepreneurial skills and gradually brings together a unique set of attitude and strategic alliance to build a better future for everyone.

For over thirty five years in manufacturing industry, we have experienced a lot of problems, from shortage of supplies to lack of skilled workers and even inventory challenges. We then start thinking of how we can develop, build and invest in clever and feasible ideas that can turn these huge difficulties into great triumph. We first begin with our community. A lot of people are striving, seeking a good job to help their families. That is when we come up with entrepreneurial training. We're encouraging young minds to use their skills and talent, unleashes their leadership potential, and helping them to reach their goal. Then we started to reach out to our local farmers. It's no secret that they are the ones who get the short end of the stick. Supporting local is one way to help them. Instead of importing goods, we decided to buy our farmers' produce. We also create new products using goods we abundantly grow here like coconut, rice, mushroom etc.

Supporting our farmers, entrepreneurial training and community development are indeed great ways to create sustainable ideas where we can see problems as opportunities and create solutions efficiently. Slowly but surely, we establish a legacy and the last step is to keep passing the torch for the next generation.
